

The BitMEX trading platform represents the cornerstone of 100x. As the world's most advanced peer-to-peer crypto-products trading platform and API, BitMEX provides knowledge, confidence, and precision to hundreds of thousands of traders, transacting billions of USD per day.

One of the key drivers for BitMEX's success is its user experience. Traders from the traditional finance background find a familiar and engaging experience on BitMEX. The UX team's charter was to build on this theme of necessary complexity and create the best experiences for BitMEX's customers.

The phenomenal success of BitMEX's user experience set the standard for all cryptocurrency exchanges.

At BitMEX, I worked with the Head of User Experience and other designers on some very interesting problems in the Crypto Fintech space.

Between 2018 to 2021, I worked on a variety of features on the mobile and desktop platforms as listed here.

This portfolio summarizes on four of them and goes into the details of one.

But first, let's talk about the science behind the art.
