Portfolio 2018-2021

Customer Goals

- _ Understand the current market
- _ Easily access and read critical information, while on the move

Challenges

- _ Large amount of different data with similar priority
- _ Constantly changing multiple pieces of information
- _ Design to avoid fat-fingering errors

Product Goals

- _ Provide appropriate information to the user to help them make right & quick financial decision

INSTRUMENTALS

Pravivideo

High traffic screen in the app where the expert customer makes the decision to open, close or amend a position.

the *Journal of the American Medical Association* (JAMA) and the *New England Journal of Medicine* (NEJM).

For the purpose of this study, we used the following search strategy: we searched the JAMA and NEJM databases for all articles published between 1990 and 2000 that contained the words "cognitive" and "bias" in the title or abstract.

We then reviewed the abstracts of all articles identified by this search strategy. We included in our analysis all articles that met the following criteria:

1. The article was published in the JAMA or NEJM.

2. The article contained the words "cognitive" and "bias" in the title or abstract.

3. The article was a primary research article, review article, or editorial.

4. The article was written in English.

5. The article was not a duplicate of another article in the JAMA or NEJM.

6. The article was not a letter to the editor or a short communication.

7. The article was not a case report or a case series.

8. The article was not a clinical trial or a clinical study.

9. The article was not a meta-analysis or a systematic review.

10. The article was not a commentary or a discussion.

11. The article was not a book review or a book chapter.

12. The article was not a conference abstract or a poster presentation.

13. The article was not a clinical guideline or a clinical practice statement.

14. The article was not a clinical practice guideline or a clinical practice statement.

INSTRUMENT DETAILS

High traffic screen in the app where the expert customer makes the decision to open, close or amend a position.

Customer Goals

- _ Understand the current market
- _ Easily access and read critical information, while on the move

Product Goals

- _ Provide appropriate information to the user to help them make right & quick financial decision

Challenges

- _ Large amount of different data with similar priority
- _ Constantly changing multiple pieces of information
- _ Design to avoid fat-fingering errors

INSTRUMENT DETAILS

Design Wins & Innovations

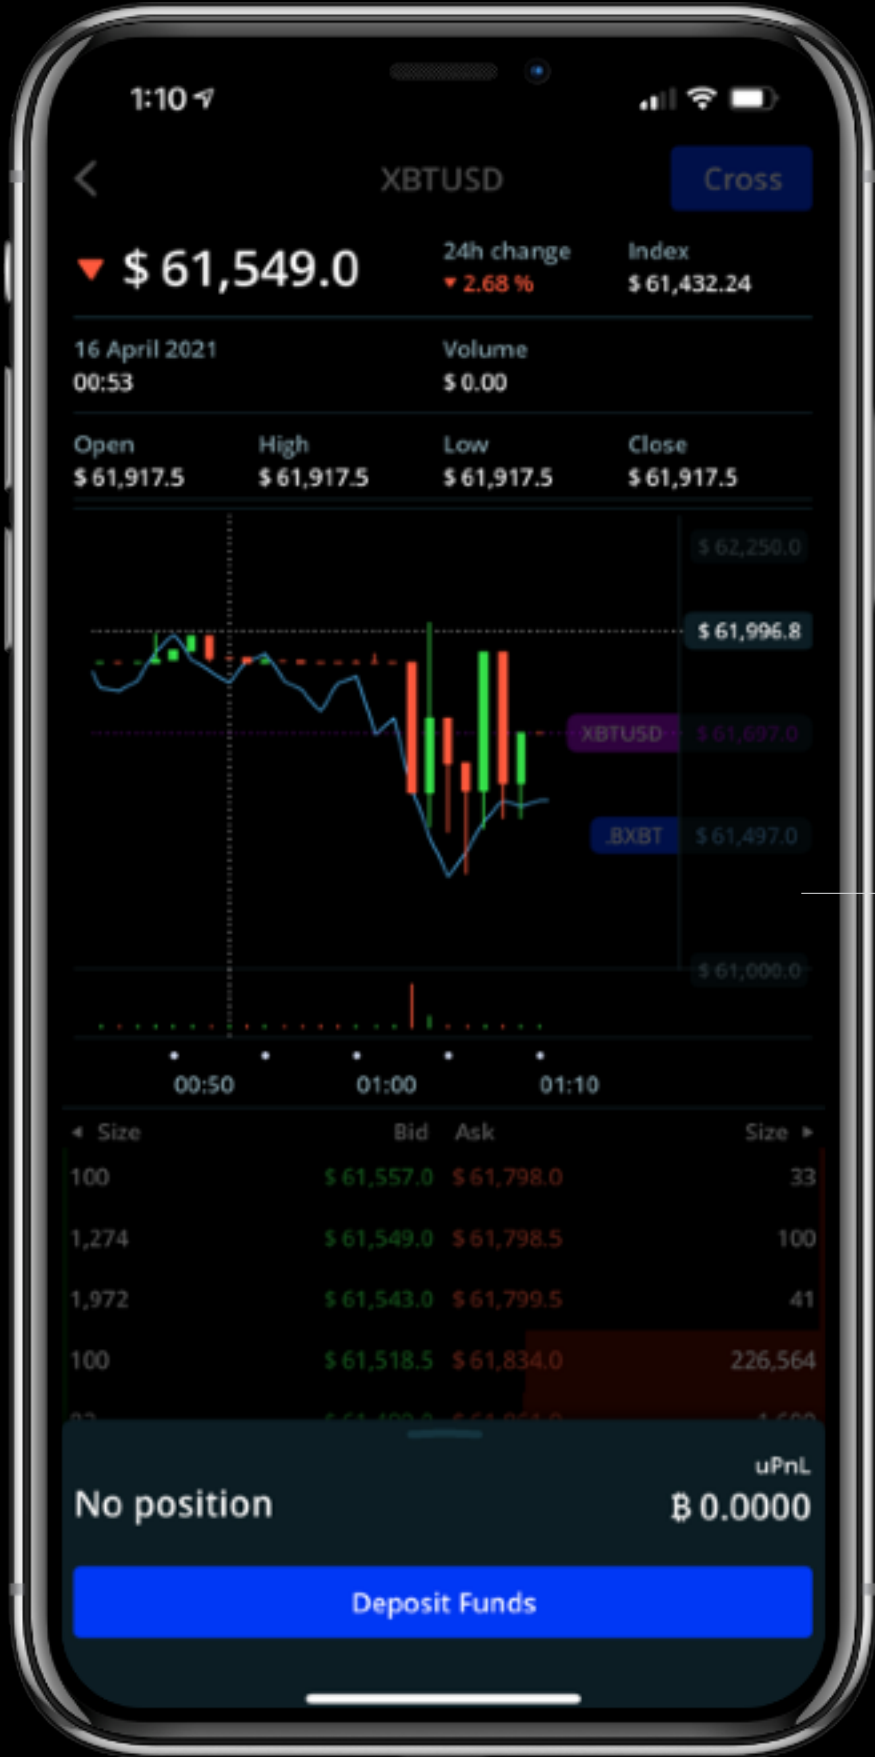

Necessarily Complex

High Information Density but still readable on quick glance

Custom designed Candlestick chart with personalized markers

Constantly updating order book with progressive disclosure.

Constant activity reflected on screen with subtle yet prominent animation

Candlestick chart stub state reveals further OHLC info while graying out the screen to help user focus on critical information
